## COPYING

The *Journal* is registered with the Copyright Clearance Center, 21 Congress St., Salem, Mass. 01970. Organizations in the USA which are also registered with C.C.C. may therefore copy material (beyond the limits permitted by sections 107 and 108 of US copyright law) subject to payment to C.C.C. of the per-copy fee of $05.00. This consent does not extend to multiple copying for promotional or commercial purposes. Code 0022-1120/86/4686-0001 $05.00.

ISI Tear Service, 3501 Market Street, Philadelphia, Pennsylvania 19104, USA is authorized to supply single copies of separate articles for private use only.

For all other use of material from the *Journal* permission should be sought from Cambridge or the American Branch of Cambridge University Press.

## SUBSCRIPTIONS

The JOURNAL OF FLUID MECHANICS (ISSN 0022-1120) is published in 12 volumes each year. All orders must be accompanied by payment. Single volumes cost £29 net (US $66 in the USA and Canada) plus postage. The subscription price (which includes postage) to volumes 162–173, 1986, is £334 (US $760 in the USA and Canada) for institutions; £167 (US $380) for individuals. Copies of the journal for subscribers in the USA and Canada are sent by air to New York. Second class postage is paid at New York, NY, and at additional mailing offices. Claims for missing issues will be considered only if made immediately upon receipt of the subsequent issue. Copies of back numbers are available from Cambridge University Press. POSTMASTER: send address changes in USA and Canada to *Journal of Fluid Mechanics*, Cambridge University Press, 32 East 57th Street, New York, NY 10022.

Volume 163 February 1986

## CONTENTS

A stability analysis of non-time-periodic perturbations of buoyancy-induced flows in pure water near 4° C. I. M. El-Henawy, B. D. Hassard and N. D. Kazarinoff *page* 1

Remarks on a paper by Aref and Flinchem. R. T. Pierrehumbert 21

The hydraulics of two flowing layers with different densities. Laurence Armi 27

The motion of a viscous drop sliding down a Hele-Shaw cell. Kalvis M. Jansons 59

Calculations of self-excited impinging jet flow. Samuel Ohring 69

Numerical investigation of incompressible flow in grooved channels. Part 1. Stability and self-sustained oscillations. N. K. Ghaddar, K. Z. Korczak, B. B. Mikic and A. T. Patera 99

Unsteady boundary layers with an intelligent numerical scheme. Tuncer Cebeci 129

An exact solution of the Navier–Stokes equation which describes non-orthogonal stagnation-point flow in two dimensions. J. M. Dorrepaal 141

Vortex excitation of prisms with elongated rectangular, H and ⊢ cross-sections. Yasuharu Nakamura and Masamichi Nakashima 149

The spherical-droplet problem of evaporation and condensation in a vapour–gas mixture. Yoshimoto Onishi 171

Rayleigh–Bénard convection in an intermediate-aspect-ratio rectangular container. Paul Kolodner, R. W. Walden, A. Passner and C. M. Surko 195

Structural characteristics of a developing turbulent planar jet. F. O. Thomas and V. W. Goldschmidt 227

On the instability of a three-dimensional attachment-line boundary layer: weakly nonlinear theory and a numerical approach. Philip Hall and Mujeeb R. Malik 257

An experimental investigation of a turbulent shear flow with separation, reverse flow, and reattachment. R. Ruderich and H. H. Fernholz 283

Airfoils with separation and the resulting wakes. Tuncer Cebeci, R. W. Clark, K. C. Chang, N. D. Halsey and K. Lee 323

Second-order modelling of particle dispersion in a turbulent flow. Tsan-Hsing Shih and J. L. Lumley 349

Assessment of local isotropy using measurements in a turbulent plane jet. R. A. Antonia, F. Anselmet and A. J. Chambers 365

Anisotropy of the temperature dissipation in a turbulent wake. R. A. Antonia and L. W. B. Browne 393

Flow of axisymmetric red blood cells in narrow capillaries. T. W. Secomb, R. Skalak, N. Özkaya and J. F. Gross 405

Numerical simulation of the $\alpha$-effect and turbulent magnetic diffusion with molecular diffusivity. I. T. Drummond and R. R. Horgan 425

Aspects of the equilibrium puff in transitional pipe flow. Promode R. Bandyopadhyay 439

Simultaneous flow visualization and Reynolds-stress measurement in a turbulent boundary layer. A. M. Talmon, J. M. G. Kunen and G. Ooms 459

The elastohydrodynamic collision of two spheres. Robert H. Davis, Jean-Marc Serayssol and E. J. Hinch 479

Reviews

*Problems and Prospects in Long and Medium Range Weather Forecasting, edited by D. M. Burridge and E. Källen* 498
